

## **Do you have a brilliant idea for a small change that could make a big difference for the environment?**

Each day this Lent, Jesuits in Britain will share one change we can make in our everyday lives to care for our common home. Climate change is having a devastating effect on God's creation. It is having a particular impact now on the world's poorest and most marginalised people. Jesuit schools and parishes have been working hard to respond to Pope Francis' call to look after the environment. The changes you are making are very important in our battle against climate change.

**Here's how you can help:** We need your very best suggestion for one small change you could make in your day to help look after our planet (e.g. walking to school or work). From the super simple to the wonderfully creative, we want to hear your ideas! The top 40 suggestions will be featured on the Jesuits in Britain website, one for each day of Lent. The person who makes the best suggestion will win a copy of the Pope's document *Laudato Si*, signed by Pope Francis himself.

If we all make one of these simple changes each day for the whole of Lent, together we can make a big difference to help our planet.

Please write your suggestion on the reverse side or email [info@jesuitmissions.org.uk](mailto:info@jesuitmissions.org.uk) with your suggestions.

**We can't wait to hear from you!**
